

TUM DAO

# GOALS

- Gain first Web3 experience by building real projects
- Get insights into the existing industry by researching
- Integrate blockchain technology into TUM
- Cooperate with blockchain-related businesses

# IDEAS

- Create the first student DAO at TUM
- NFT which comes in addition to the degree certificate (e.g. styled by artificial intelligence)
- Paying with crypto (say, EUROC) in the mensa
- TUM COIN in the tum app
- Governance-voting for school presidents or other student initiatives
- Learn to earn - TUM game
- Creating a crypto investment fond
- Operating validating nodes
- Web3 hackathons, media presence ...

Your ideas?

# IDEAS

- Providing governance/DAO infrastructure to other eVs
- Motivate student research: bounty for projects
- NFT infrastructure for Art students & galleries
- Provide technology for other universities

# WHY?

- Learn
- Get Web3 experience based on REAL projects → creating > talking
- DAO ≠ Hierarchy, work on your own initiatives and help others
- Find a co-founder for your future project
- Put the project in your portfolio
- Get in contact with people from the industry
- Bonus: TUM Blockchain Club - is it even alive?
